- Consents now granted for bulk sampling and certificate of compliance at Talisman site.

**PROJECTS**

The quarterly activities report lodged with the exchanges on 21<sup>st</sup> April provides investors with the latest update on the company's activities and its projects. The company will provide updates in the Annual Report on any further activities.

## Asset Values

During the year the Company has successfully secured funding and consents to ensure the near term operational plans can come to fruition. Once the activities currently being undertaken at Talisman are underway and Directors have further results from data analysis, the Directors will be in a position to determine if an increased valuation is warranted. The Directors have considered if there are any indications of impairment and concluded there are none.

During the period under review the management team identified an error in the carrying values of two balance sheet items. The two errors related to the carrying value of the Talisman Mine Development asset (Non-Current Asset) and the Provision for Rehabilitation Reserve (Non-Current Liability). An entry in the March 2014 reporting period brought a \$666,023 provision for mine rehabilitation onto the balance sheet as a current liability while capitalising the same amount into the Talisman Mine development asset. NZIAS 16 Property, Plant & Equipment requires a provision to be recognised when financial rehabilitation at the end of the asset's useful life is probable. After discussions with the company's mining engineer and employees of the Department of Conservation it was clear that no obligation existed at balance date and that the full provision should be reversed.

Consequently, the Balance Sheet comparative figures do not include a Non-Current liability for the Rehabilitation Provision of \$666,023. The Assets Under Construction figures in the balance sheet for both the year ended 31 March 2016 and the year ended 31 March 2017 have been restated to reflect the reversal of the provision. The prior period error did not affect the earnings per share calculations or the net tangible assets per share calculations.

These annual financial statements are subject to completion of the audit.

No dividends or distributions were paid or are planned.

All statements are prepared in accordance with New Zealand equivalents to International Financial Reporting Standards.

There are no accounting policies which the directors believe are critical to the portrayal of New Talisman's financial condition and results which require the directors to make judgements and estimates about matters that are inherently uncertain.

All accounting policies have been applied on bases consistent with those used in previous years.

#### **About New Talisman Gold Mines Ltd**

New Talisman Gold is a dual listed (NZSX & ASX: NTL) with over 2,300 shareholders who are mainly from Australia and New Zealand. It is a leading New Zealand minerals development and exploration company with a mining permit encompassing the Talisman mine one of New Zealand's historically most productive gold mines. Its gold properties near Paeroa in the Hauraki District of New Zealand are a granted mining permit, including a JORC compliant mineral resource within the original Talisman underground mine, and a Heads of agreement with Newcrest on an adjacent exploration permit along strike from the mine.
