## FOR PUBLIC RELEASE

### **CORRECTION TO REPORT dated 16 September 2010 regarding BROKEN HILL PROSPECTING LTD MINERAL RESOURCES**

Heritage Gold advises a correction to the Competent Persons Statement that accompanied the above report.

For clarity the Competent Persons Statement appears below with the correction in bold.

#### **Competent Person's Statement**

The information in this report that relates to mineral resources is based on information compiled by Mr Alex Trueman, who is a Member of The Australasian Institute of Mining and Metallurgy. Mr Trueman **who is no longer an employee of Snowden and is acting as an independent consultant** has consented to this report. Mr Trueman has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2004 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Mr Trueman consents to the inclusion in this report of the matters based on his information in the form and context in which it appears.

#### **SNOWDEN REPORT**

A full copy of the Snowden report on the mineral assets of Broken Hill Prospecting has been posted on the Heritage Gold website with the consent of Snowden.

#### **About Heritage Gold**

Heritage Gold (NZ) Limited is a leading New Zealand, dual listed (NZSX: HGD, ASX: HTM) minerals exploration company with over 1600 Australasian shareholders and a portfolio of high quality mineral prospects in both countries.

Its gold tenements in the Coromandel region of New Zealand include the historic Talisman Mine at Karangahake which has a JORC<sup>2</sup> resource of 205,000 oz gold and 800,000 oz silver. The mine produced over 1 million oz gold and 3 million oz silver during its peak mining period.

Heritage Gold owns 28.13% of Broken Hill Prospecting Limited (BHPL), which is planning to develop a cobalt project at Thackaringa, about 20 km southwest of Broken Hill in New South Wales. BHPL has identified several new Broken Hill-style base metal occurrences, as well as a near-surface cobalt deposit.
